# INDEX TO VOLUME 279

## January–June 1965

## SUBJECT INDEX

Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed with titles of their papers in alphabetical order in the Author Index.

---

A

Abnormal voltages in X-ray units. Analysis of high voltage waveforms in X-ray units; II-Abnormal voltages (Kanamori), 246

Active network synthesis. Active network synthesis with a nonideal device (Balabanian), 334

Acoustic radiation. The radiation of sound from a rectangular piston on a corner (Mangulis), 124

Acoustics. Radiation impedance of a rectangular piston on a corner (Mangulis), 200

Applied mathematics. Comparison of computer methods of solving the Eigenvalue problem of molecular spectroscopy (Hart), 1

Anisotropic fluids. Internal instability of anisotropic viscous and viscoelastic media under initial stress (Biot), 65

Approximate solution to the diffusion equation. Quasi-analytic solution of the diffusion equation (Cobble), 110

B

Band saw vibration. A study of band saw vibrations (Mote), 430

Book Reviews

Aizerman M. A. and F. R. Gantmacher: Absolute stability of regulator systems, 140

Alt, Franz and Morris Rubinoff (edited by) Advances in computers, 223

Andrews, Lawrence J. and Raymond M. Keefer: Molecular complexes in organic chemistry, 390

Barton, David K.: Radar system analysis, 477

Basdekis, C. H.: ABS plastics, 139

Beckurts, K. H. and K. Wirtz: Neutron physics, 310

Beran, Mark J. and George B. Parrent, Jr.: Theory of partial coherence, 219

Bleuler, E. and R. O. Haxby (edited by): Methods of experimental physics, 224

Bohm, David: The special theory of relativity, 388

Bolotin, V. V.: The dynamic stability of elastic systems, 478

Bowden, F. P. and D. Tabor: The friction and lubrication of solids, Part II, 479

Brandt, John C. and Paul Hodge: Solar system astrophysics, 139

Brillouin, Leon: Scientific uncertainty and information, 218

Brown, J. and E. V. D. Glasier: Signal analysis, 56

Carlin, H. J. and A. B. Giordano: Network theory, 60

Chamberlain, J. W.: Motion of charged particles in the earth's magnetic field, 316

Coombe, R. A.: Magnetohydrodynamic generation of electrical power, 477

Cottrell, A. H.: Theory of crystal dislocations, 140

Crewe, Albert V. and Joseph J. Katz: Research, U. S. A., 59

Davie, O. H.: Elements of pulse techniques, 226

Dryden, H. L. and T. von Karman: (edited by): Advances in applied mechanics, vol. 8, 311

Dufour, Louis and Raymond Defay: Thermodynamics of clouds, 389

Ericson, David B. and Goesta Wollin: The deep and the past, 60

Faupel, J. H.: Engineering design, 475

Finkelnburg, Wolfgang: Einführung in die atomphysik, 220

Flammarion book of astronomy, 396

*Book Reviews—Con't.*

Friedman, Avner: Partial differential equations of parabolic type, 473

Fritsch, H. L. and J. L. Lebowitz (edited by): The equilibrium theory of classical fluids, 316

Gatland, Kenneth W. (edited by): Telecommunication satellites, 57

Gelbaum, B. R. and J. M. H. Olmsted: Counterexamples in analysis, 473

Gentry, F. E. *et al.*: Semiconductor controlled rectifiers, 140

Golomb, W. W. *et al.*: Digital communications with space applications, 312

Gray, H. B.: Electrons and chemical bonding, 316

Greenwood, D. T.: Principles of dynamics, 480

Hansen, R. C. *et al.*: Microwave scanning antennas, Vol. I: apertures, 55

Haviland, R. P.: Engineering reliability and long life design, 55

Henley, E. J. and H. Krouts (edited by): Advances in nuclear science and technology, 393

Hill, T. L.: Thermodynamics of small systems, Part I, 315

Hilton, Alice, Mary: Logic, computing machines and automation, 136

Hurty, W. C. and M. F. Rubinstein: Dynamics of structures, 394

Kobe K. A. and J. J. McKetta, Jr. (edited by): Advances in petroleum chemistry and refining, Vol. IX, 314

Kolsky, H. and W. Pragger: Stress waves in anelastic solids, 54

Lascelles, June: Tetrapyrrole biosynthesis and its regulation, 391

Lawrence, John *et al.*: Radioisotopes and radiation, 59

Linfoot, E. H.: Fourier methods in optical image evaluation, 316

Lur'e, A. I.: Three-dimensional problems of the theory of elasticity, 392

Lynn, J. W.: Tensors in electrical engineering, 309

Maley, G. A. and E. J. Skiko: Modern digital computers, 137

Mason, Warren P. (edited by): Physical acoustics, 220

Matsch, Leander W.: Capacitors, magnetic circuits and transformers, 480

McClintock, Michael: Cryogenics, 221

McCormick, J. M. and M. G. Salvadori: Numerical methods in Fortran, 60

Mendelssohn K. (edited by): Progress in cryogenics, Vol. 4, 315

Mesarovic, M. D. (edited by): Views on general systems theory, 476

Miller, I. and J. E. Freund: Probability and statistics for engineers, 474

Moder, J. J. and C. R. Phillips: Project management with CPM and PERT, 60

Moore, F. K. (edited by): Theory of laminar flows, 394

Munro, L. A.: Chemistry in engineering, 58

Newton, R. G.: The complex *j*-plane, 221

Okamoto, Y. and Walter Brenner: Organic semi-conductors, 391

Parker, E. N.: Interplanetary dynamical processes, 138

Pedersen, Erik S.: Nuclear energy in space, 387

Ranous, Charles A.: Communication for engineers, 222

Richards, J. H. and J. B. Hendrickson: The biosynthesis of steroids, terpenes and acetogenins, 313

Rogers, G. L.: Mechanics of solids, 396

Rosenstein, A. B. *et al.*: Engineering communications, 140

Sakurai, J. J.: Invariance principles and elementary particles, 137

Samsonov, G. V.: Refractory transition metal compounds: high temperature cermets, 316

Seaborg, Glenn T. and Daniel M. Wilkes: Education and the atom, 59

Searle, C. L. *et al.*: Elementary circuit properties of transistors, 396

Segré, Emilio (edited by): Annual review of nuclear science, Vol. 14, 472

Spirin, A. S.: Macromolecular structure of ribonuclein acids, 226

Sullivan, Walter: We are not alone, 224

Sundheim, Benson R. (edited by): Fused Salts, 57

von Alven, William H. (edited by): Reliability engineering, 225

Weigel, R. L.: Oceanographical engineering, 309

Zichichi, A. (edited by): Strong, electromagnetic and weak interactions, 136

Zinn, Walter H. *et al.*: Nuclear Power, U. S. A., 59

Brown Medal: William Jaird Levitt, 319

C

Certificate of Merit: Joseph Dennis Christian, 144

Chemisorption. Low energy electron diffraction study of the adsorption of oxygen on a (100) tungsten surface (Anderson and Danforth), 160

Circuit theory. Bounds on impedance functions of $R$, $\pm L$, $\pm C$, $T$ networks (Huang and Lee), 83

Civil engineering. Sensitivity of a conical penetrator to variations in mortar mix parameters (McCormick and Cowgill), 464

Committee on Science and the Arts

Abstract of meetings: December 9, 1964, 63; January 13, 1965, 144; February 10, 1965, 228; March 10, 1965, 319; April 14, 1965, 400; May 12, 1965, 485

Concentrated loads. Displacements in closed circular rings subject to concentrated diametral loads (Silverman and Moody), 374

Control systems. Extension of Popov's theorems for stability of nonlinear control systems (Ku and Chieh), 401

Control systems. Stability studies for a class of nonlinear difference equations using Liapunov's second method (Puri and Drake), 209

Control systems theory. On the minimum effort regulation of stationary linear systems (Flügge-Lotz and Marbach), 229

Corner reflector. Radiation impedance of a rectangular piston on a corner (Mangulis), 200

Creep. Creep compliance response of a cohesive soil (Kondner and Krizek), 366

D

Difference equations. On non-negative difference analogues of elliptic differential equations (Greenspan and Jain), 360

Diffraction by a corner. The radiation of sound from a rectangular piston on a corner (Mangulis), 124

Directed graph theory. On the degrees of the vertices of a directed graph (Hakimi), 290

Distributed RC networks. On the effective dominant pole of the distributed RC networks (Kelly and Ghausi), 417

Dynamics. Mathematical formalism for probabilistic dynamical theories (Rosen), 457

E

Effective volumes. Minimum volumes to ensure homogeneity in certain conglomerates (Brown), 189

Eigenfunction, numerical. A note on numerical evaluation of eigenvalues and eigenfunctions for continuous systems (Zudans), 46

Elastic blades in rotation. Stresses set up by rotation in thin elastic blades (Chowdhury and Dhaliwal), 39

Electron diffraction, low energy. Low energy electron diffraction study of the adsorption of oxygen on a (100) tungsten surface (Anderson and Danforth), 160

F

Feedback control. On the minimum effort regulation of stationary linear systems (Flügge-Lotz and Marbach), 229

Flow. Internal instability of anisotropic viscous and viscoelastic media under initial stress (Biot), 65

Franklin Institute

Committee on Science and the Arts. *See* main index

Journal of The Franklin Institute. *See* main index

Library. *See* main index

Meetings. *See* main index

Membership Roll of Honor. *See* main index.

Franklin Medal: Frederick Seitz, 485

Friction. Torsional instability from frictional oscillations (Kemper), 254

G

Graph theory. On the degrees of the vertices of a directed graph (Hakimi), 290

H

Heat transfer conduction. Quasi-analytic solution of the diffusion equation (Cobble), 110

High-voltage waveforms in abnormal voltage X-ray units. Analysis of high voltage waveforms in X-ray units: II-Abnormal voltages (Kanamori), 246

High-voltage waveforms in single-phase X-ray units. Analysis of high-voltage waveforms in X-ray units: I-Single phase (Kanamori), 147

High voltage waveforms in three-phase X-ray units. Analysis of high-voltage waveforms in X-ray units: III-Three phase (Kanamori), 347

Homogeneity. Minimum volumes to ensure homogeneity in certain conglomerates (Brown), 189

I

Images. The radiation of sound from a rectangular piston on a corner (Mangulis), 124

Integral equations. The application of numerical filtering to the solution of integral equations encountered in indirect sensing measurements. (Twomey), 95

J

Journal of The Franklin Institute
Publications received: 141

K

Kinematics. Kinematic synthesis of a rotary-to-linear recording mechanism (Freudenstein), 325

Kinematic synthesis. Kinematic synthesis of a rotary-to-linear recording mechanism (Freudenstein), 325

L

Liapunov's second method. Stability studies for a class of nonlinear difference equations using Liapunov's second method (Puri and Drake), 209

Library of The Franklin Institute
New Books, 61, 142, 227, 317, 397, 481

Linear graphs. On topological approaches to network theory (Ku and Bedrosian), 11

Linear graph theory. On the degrees of the vertices of a directed graph (Hakimi), 290

Linear networks. Synthesis of the impedance matrix of star port resistor networks (Harrison), 445

M

Mathematics. Mathematical formalism for probabilistic dynamical theories (Rosen), 457

Measurement by numerical solution. The application of numerical filtering to the solution of integral equations encountered in indirect sensing measurements (Twomey), 95

Mechanical vibrations. Torsional instability from frictional oscillations (Kemper), 254

Mechanisms. Kinematic synthesis of a rotary-to-linear recording mechanism (Freudenstein), 325

Meetings of The Franklin Institute
Minutes of the Stated Meeting: December 16, 1964, 64; January 20, 1965, 145; February 17, 1965, 228; March 17, 1965, 324; April 21, 1965, 399; May 19, 1965, 484

Membership Roll of Honor, 320

Moduli. Minimum volumes to ensure homogeneity in certain conglomerates (Brown), 189

Mortar mix parameters. Sensitivity of a conical penetrator to variations in mortar mix parameters (McCormick and Cowgill), 464

N

Networks. On topological approaches to network theory (Ku and Bedrosian), 11

Network theory. Bounds on impedance functions of $R$, $\pm L$, $\pm C$, $T$ networks (Huang and Lee), 83

Network theory. On the effective dominant pole of the distributed RC networks (Kelley and Ghausi), 417

Network theory. Synthesis of the impedance matrix of star port resistor networks (Harrison), 445

Network topology. On topological approaches to network theory (Ku and Bedrosian), 11

Nonlinear control systems. Extension of Popov's theorems for stability of nonlinear control systems (Ku and Chieh), 401

Nonlinear difference equations. Stability studies for a class of nonlinear difference equations using Liapunov's second method (Puri and Drake), 209

Numerical analysis. On non-negative difference analogues of elliptic differential equations (Greenspan and Jain), 360

Numerical eigenvalues. A note on numerical evaluation of eigenvalues and eigenfunctions for continuous systems (Zudans), 46

Numerical filtering. The application of numerical filtering to the solution of integral equations encountered in indirect sensing measurements (Twomey), 95

Numerical methods. Comparison of computer methods of solving the Eigenvalue problem of molecular spectroscopy (Hart), 1

**O**

Optimum control. Method of characteristic constants and retro-thrust optimality in a gravitational field—necessary and sufficient conditions (Cavoti), 169

Optimum control. On the minimum effort regulation of stationary linear systems (Flügge-Lotz and Marbach), 229

Optimum decomposition. Active network synthesis with a nonideal device (Balabanian), 334

**P**

Partial differential equations. On nonnegative difference analogues of elliptic differential equations (Greenspan and Jain), 360

Photoelasticity. The effect of plasticity on the stress-distribution of thin notched plates in tension (Theocaris), 22

Plasticity. The effect of plasticity on the stress-distribution of thin notched plates in tension, (Theocaris), 22

Popov's theorems. Extension of Popov's theorems for stability of nonlinear control systems (Ku and Chieh), 401

Potts Medal: Christopher S. Cockerell, 228

Probabilistic dynamical theories. Mathematical formalism for probabilistic dynamical theories (Rosen), 457

**Q**

Quasi-analytic method. Quasi-analytic solution of the diffusion equation (Cobble), 110

**R**

Radiation impedance. Radiation impedance of a rectangular piston on a corner (Mangulis), 200

RC networks. On the effective dominant pole of the distributed RC networks (Kelly and Ghausi), 417

Rings, circular. Displacements in closed circular rings subject to concentrated diametral loads (Silverman and Moody), 374

Rotation of elastic blades. Stresses set up by rotation in thin elastic blades (Chowdhury and Dhaliwal), 39

**S**

Self-excited oscillations. Torsional instability from frictional oscillations (Kemper), 254

Sensitivity. Active network synthesis with a nonideal device (Balabanian), 334

Single-phase X-ray units. Analysis of high-voltage waveforms in X-ray units: I-Single-Phase (Kanamori), 147

Solid mechanics. A method of viscoelastic stress analysis using elastic solutions (Schapery), 268

Space mechanics. Method of characteristic constants and retro-thrust optimality in a gravitational field—necessary and sufficient conditions, (Cavoti), 169

Spectroscopy. Comparison of computer methods of solving the Eigenvalue problem of molecular spectroscopy (Hart), 1

Star port resistor networks. Synthesis of the impedance matrix of star port resistor networks (Harrison), 445

Stress analysis. A method of viscoelastic stress analysis using elastic solutions (Schapery), 268

Stress analysis. Displacements in closed circular rings subject to concentrated diametral loads (Silverman and Moody), 374

Stress concentration factors. The effect of plasticity on the stress-distribution of thin notched plates in tension (Theocaris), 22

Stresses. Internal instability of anisotropic viscous and viscoelastic media under initial stress (Biot), 65

Stresses in rotating elastic blades. Stresses set up by rotation in thin elastic blades (Chowdhury and Dhaliwal), 39

Surface physics. Low energy electron diffraction study of the adsorption of oxygen on a (100) tungsten surface (Anderson and Danforth), 160

**T**

Trajectory optimization. Method of characteristic constants and retro-thrust optimality in a gravitational field—necessary and sufficient conditions (Cavoti), 169

Three-phase X-ray units. Analysis of high-voltage waveforms in X-ray units (Kanamori), 346

V

Vibration. A study of band saw vibrations (Mote), 430
Vibration frequencies, numerical. A note on numerical evaluation of eigenvalues and eigenfunctions for continuous systems (Zudans), 46
Viscoelasticity. A method of viscoelastic stress analysis using elastic solutions (Schapery), 268
Viscoelasticity in solids. Internal instability of anisotropic viscous and viscoelastic media under initial stress (Biot), 65
Viscoelasticity of cohesive soils. Creep compliance response of a cohesive soil (Kondner and Krizek), 366

W

Wetherill Medal: Wendell F. Moore, 319
Wetherill Medal: John Hamilton Reynolds, 485
Wetherill Medal: Frederick Dominic Rossini, Eugene Merle Shoemaker and Edward Ching-Te Chao, 63

X

X-ray units: abnormal voltages. Analysis of high voltage waveforms in X-ray units: II—Abnormal voltages (Kanamori), 246
X-ray units: single phase. Analysis of high-voltage waveforms in X-ray units: I—Single phase (Kanamori), 147
X-ray units: three phase. Analysis of high-voltage waveforms in X-ray units: III—three phase (Kanamori), 347

# INDEX TO VOLUME 280

## July–December, 1965

## SUBJECT INDEX

Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed with titles of their papers in alphabetical order in the Author Index.

A

Active networks. The realization and measurement of n-terminal active networks (Sharpe), 256

Adaptive control. An empirical Bayes approach to adaptive control (Ula and Kim), 189

Altitude control. The damped angular motion of a magnetically oriented satellite (Chen), 291

Analysis of simply supported conical shells. Limit analysis of simply supported conical shells subjected to uniform internal pressure (Kuech and Lee), 71

Angular velocity. Measurement of angular velocity and linear acceleration using linear accelerometers (Krishnan), 307

Anisotropic plate. Large oscillations of an anisotropic triangular plate (Nowinski and Ismail), 417

Applied statistics. An empirical Bayes approach to adaptive control (Ula and Kim), 189

Automatic control. The steady state response of a servosystem taking stiction and Coulomb friction into consideration (Swamy), 205

B

Bayesian control policies. Optimal control of partially observable Markovian systems (Aoki), 367

Beam-columns. The dynamic stability of beam-columns with a fixed distance between supports (Morris), 163

Bellman's equation. On Bellman's functional equation and a class of time-optimal control systems (Tchamran), 493

Book Reviews

Akhiezer, A. I. and V. B. Berestetskii: Quantum electrodynamics, 451

Bak, Thor A. (edited by): Phonons and phonons interactions, 185

Ballhausen, Carl J. and Harry B. Gray: Molecular orbital theory, 287

Barlow, R. E. and F. Proschan: Mathematical theory of reliability, 176

Beer, Albert C.: Galvanomagnetic effects in semiconductors, 88

Bennett, William R. and James R. Davey: Data transmission, 551

Berg, W. F. (edited by): Photographic science, 281

Biot, M. A.: Mechanics of incremental deformations, 548

Bishop, R. E. D. *et al.*: The matrix analysis of vibration, 554

Bloembergen, Nicholaas: Nonlinear optics, 363

Bonner, William A. and Albert J. Castro: Essentials of modern organic chemistry, 288

Boresi, Arthur P.: Elasticity in engineering mechanics, 555

Bracewell, Ron: The Fourier transform and its applications, 453

Bronowski, J.: Science and human values, 364

Brout, Robert H.: Phase transitions, 284

Chadderton, Lewis T.: Radiation damage in crystals, 549

Christy, R. W. and Agnar Pytte: The structure of matter, 459

Colborn, Robert (edited by): Modern science and technology, 96

Daniels, J. M.: Oriented nuclei-polarized targets and beams, 362

Book Reviews (continued)
DeBenedetti, Sergio: Nuclear interactions, 280
DeJuhasz, Kalman J.: Spray literature abstracts, Vol. 2, 185
Delahay, Paul: Double layer and electrode kinetics, 359

C

Clamer Medal: Alexander L. Feild, 100; Lawrence Stamper Darken, 579
Committee on Science and the Arts
Abstracts of meetings: June 9, 1965, 100; October 13, 1965, 579
Computers. Analysis of large complex frames on a small computer (Rubinstein), 101
Conical shells. Limit analysis of simply supported conical shells subjected to uniform internal pressure (Kuech and Lee), 71
Constant-time loci. Constant-time loci in the phase plane for nonlinear systems (Deekshatulu and Balasubramanian), 474
Continuum mechanics. On linear equations of isotropic elastic plates and shells (Yu), 395
Control systems. Constant-time loci in the phase plane for nonlinear systems (Deekshatulu and Balasubramanian), 474
Control systems. On Bellman's functional equation and a class of time-optimal control systems (Tchamran), 493
Control systems. Stability and oscillations in systems containing one or more single-valued symmetric nonlinearities (Grayson), 52

D

Detection theory. On polarity detection schemes with non-gaussian inputs (Kanefsky and Thomas), 120
Dynamics. Wave theories of traffic flow (Pipes), 23
Dynamic stability. The dynamic stability of beam-columns with a fixed distance between supports (Morris), 163

E

Earth satellite. The damped angular motion of a magnetically oriented satellite (Chen), 291

Elasticity. On a general theory of viscoelasticity (Herrmann), 244

Elasticity. On linear equations of isotropic elastic plates and shells (Yu), 395

Electrical conduction. Molten zone negative resistance devices (Stern), 65

Element-value representation. Normalized element value representation of filter networks (Berry and Bedrosian), 334

External shear cracks. External cracks under longitudinal shear (Sih), 139

F

Feedback systems. On the stability of nonlinear sampled-data feedback systems (Chen), 316

Filter networks. Normalized element value representation of filter networks (Berry and Bedrosian), 334

Finite elastic deformations. The finite plane stretching of a neo-Hookean strip bonded at its ends (Levinson), 325

Flowgraphs. Flowgraph approach to Laplace transforms and transient solutions of linear systems (Gupta and Happ), 150

Frames. Analysis of large complex frames on a small computer (Rubinstein), 101

Frame structures. A variational treatment for the response of frame structures to oscillating loads (Stern and Lenzi), 231

Franklin Institute

Committee on Science and the Arts. *See* main index.

Journal of The Franklin Institute. *See* main index.

Library. *See* main index

Meetings. *See* main index

G

Gain-bandwidth. Gain-bandwidth limitations and optimum design of parametric RC converters (Klapper and Ghausi), 506

Graph theory. A note on planar graphs (Brown and Budner), 222

H

Heat transfer. Effectiveness of a layer of an absorbing-scattering gas in shielding a surface from incident thermal radiation (Viskanta), 483

I

Ionospheric distortion. Effect of ionosphere on radar waveforms (Brookner), 1

Iteration. Analysis of large complex frames on a small computer (Rubinstein), 101

J

Journal of The Franklin Institute
Publications received: 97, 365

L

Laguerre spectrum. Rational transform approximation via the Laguerre spectrum (Steiglitz), 387

Laplace transform. Flowgraph approach to Laplace transforms and transient solutions of linear systems (Gupta and Happ), 150

Library of The Franklin Institute
New Books, 99, 186, 289, 366, 460, 576

Limit analysis of conical shells. Limit analysis of simply supported conical shells subjected to uniform internal pressure (Kueeh and Lee), 71

Linear accelerometers. Measurement of angular velocity and linear acceleration using linear accelerometers (Krishnan), 307

Linear graph theory. Application of graph-theory to the synthesis of single-contact networks (Chan), 425

Liquid, (conduction). Molten zone negative resistance devices (Stern), 65

Loading. Elastic-plastic analysis for hollow spherical media under uniform radial loading (Tuba), 343

Longitudinal shear cracks. External cracks under longitudinal shear (Sih), 139

M

Magnetically oriented satellites. The damped angular motion of a magnetically oriented satellite (Chen), 291

Mathematical methods. Wave theories of traffic flow (Pipes), 23

Measurement. Measurement of angular velocity and linear acceleration using linear accelerometers (Krishnan), 307
Medal Day proceedings, 557
Meetings of The Franklin Institute
Minutes of Stated Meeting: October 20, 1965, 464; November 17, 1965, 579

**N**

Network analysis. A note on planar graphs (Brown and Budner), 222
Network theory. A note on planar graphs (Brown and Budner), 222
Network theory. Normalized element value representation of filter networks (Berry and Bedrosian), 334
Network theory. Application of graph-theory to the synthesis of single-contact networks (Chan), 425
Newcomen Medal: Vivian Fitzgeorge Estcourt, 579
Non-gaussian detection. On polarity detection schemes with non-gaussian inputs (Kanefsky and Thomas), 120
Nonlinear circuits. The steady state response of a servosystem taking stiction and Coulomb friction into consideration (Swamy), 205
Nonlinear oscillations. Stability and oscillations in systems containing one or more single-valued symmetric nonlinearities (Grayson), 52
Nonlinear response. The dynamic stability of beam-columns with a fixed distance between supports (Morris), 163
Nonlinear systems. On the stability of nonlinear sampled-data feedback systems (Chen), 316
Nonlinear systems. Constant-time loci in the phase plane for nonlinear systems (Deekshatulu and Balasubramanian), 474
Non-parametric detectors. On polarity detection schemes with non-gaussian inputs (Kanefsky and Thomas), 120
n-Terminal active networks. The realization and measurement of n-terminal active networks (Sharpe), 256

**O**

Optimal control. Gain-bandwidth limitations and optimum design of parametric RC converters (Klapper and Ghausi), 506
Optimal control systems. Optimal control of partially observable Markovian systems (Aoki), 367
Oscillations. Large oscillations of an anisotropic triangular plate (Nowinski and Ismail), 417

**P**

Plasmas. Effectiveness of a layer of an absorbing-scattering gas in shielding a surface from incident thermal radiation (Viskanta), 483
Plates. Large oscillations of an anisotropic triangular plate (Nowinski and Ismail), 417
Plates and shells. On linear equations of isotropic elastic plates and shells (Yu), 395

**R**

Radar Waveforms. Effects of ionosphere on radar waveforms (Brookner), 1
Random losses. The cumulative effect of random losses in a transmission line (Marsaglia), 443
RC Converters. Gain-bandwidth limitations and optimum design of parametric RC converters (Klapper and Ghausi), 506
Rational transform approximation. Rational transform approximation via the Laguerre spectrum (Steiglitz), 387
Realization of active networks. The realization and measurement of n-terminal active networks (Sharpe), 256
Resistance (negative). Molten zone negative resistance devices (Stern), 65

**S**

Sampled-data systems. On the stability of nonlinear sampled-data feedback systems (Chen), 316
Satellite drag. Low thrust oscillatory ascending spiral trajectories as affected by air drag (Zee), 42
Satellite trajectory. Low thrust oscillatory ascending spiral trajectories as affected by air drag (Zee), 42
Servomechanisms. The steady state response of a servosystem taking stiction and Coulomb friction into consideration (Swamy), 205

Shells. Isotropic linear strain-hardening of cylindrical shells based upon Tresca yield criterion (Thorn, Kao and Lee), 530

Signals. The cumulative effect of random losses in a transmission line (Marsaglia), 443

Single-contact networks. Application of graph-theory to the synthesis of single-contact networks (Chan), 425

Singular perturbation procedures. The finite plane stretching of a neo-Hookean strip bonded at its ends (Levinson), 325

Stability. Stability and oscillations in systems containing one or more single-valued symmetric nonlinearities (Grayson), 52

Stochastic control. An empirical Bayes approach to adaptive control (Ula and Kim), 189

Stochastic control systems. Optimal control of partially observable Markovian systems (Aoki), 367

Strain-hardening. Elastic-plastic analysis for hollow spherical media under uniform radial loading (Tuba), 343

Strain-hardening. Isotropic linear strain-hardening of cylindrical shells based upon Tresca yield criterion (Thorn, Kao and Lee), 530

Stresses and strains. Elastic-plastic analysis for hollow spherical media under uniform radial loading (Tuba), 343

Stresses and strains. The finite plane stretching of a neo-Hookean strip bonded at its ends (Levinson), 325

T

Thermal radiation. Effectiveness of a layer of an absorbing-scattering gas in shielding a surface from incident thermal radiation (Viskanta), 483

Time domain synthesis. Rational transform approximation via the Laguerre spectrum (Steiglitz), 387

Time-optimal control. On Bellman's functional equation and a class of time-optimal control systems (Tchamran), 493

Traffic flow theory. Wave theories of traffic flow (Pipes), 23

Transient analysis. Flowgraph approach to Laplace transforms and transient solutions of linear systems (Gupta and Happ), 150

Transmission lines. The cumulative effect of random losses in a transmission line (Marsaglia), 443

Tresca yield criteria. Isotropic linear strain-hardening of cylindrical shells based upon Tresca yield criterion (Thorn, Kao and Lee), 530

V

Variational methods. A variational treatment for the response of frame structures to oscillating loads (Stern and Lenzi), 231

Vibration. A variational treatment for the response of frame structures to oscillating loads (Stern and Lenzi), 231

Viscoelasticity. On a general theory of viscoelasticity (Herrmann), 244

W

Waveforms. Effect of ionosphere on radar waveforms (Brookner), 1

Wetherill Medal: Fred Noel Spiess, 100

## AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.

Aoki, Masanao: Optimal control of partially observable Markovian systems, 367
